

A SYSTEM AND METHOD FOR IMAGE EDITING USING AN IMAGE STACK

ABSTRACT OF THE DISCLOSURE

5

A system and method for editing images. A simple but powerful image stack is employed in creating an enhanced image from a *stack* of registered images. This paradigm combines pixels using multi-image operations on the image stack. Image Stacks can help create group photographs, create high
10 dynamic range images, combine images captured under different lighting conditions, remove unwanted objects from images, and combine images captured at different times and with different focal lengths.
